

Policy Document for Evaluation of Programme Outcome

Darrang College, Tezpur is affiliated to Gauhati University and follows all norms prescribed by the university in regard to admission, curriculum design, teaching-learning evaluation, exams and results. The parent university has designed the outline of course outcome however it does not provide any procedure to measure the achievement of Programme outcome (PO) and Course outcome (CO).

Darrang College has designed a policy document through committee formation for measuring POs and COs of students.

Direct attainment:

1. Direct attainment of COs is determined from the comparative analysis of students' results from 1st semester to final semester.
2. It can be achieved through conduct of project works or home assignments.
3. It can be measured through observing the progression of students to higher education.
4. Direct attainment of programme outcome can be understood by students' absorption/placement in jobs.

Indirect attainment:

1. Through analysis of Students' Satisfaction Survey.
2. Through Students' feedback process.

3. Indirect attainment of COs can be facilitated through students' involvement in co-curricular activities.
4. Through interaction in mentor-mentee sessions.
5. Through laboratory work in practical subjects.
6. Through students' class performance while conducting class presentations, group discussions etc.
7. Through field visits and excursions.

Assessment Guidelines

1. The attainment of POs should be in alignment with COs.
2. Question papers (internal evaluation) to be set to accommodate all the COs.
3. The average marks scored in evaluating against each CO will indicate the CO attainment.
4. Attainment gaps can be identified.
5. Faculty members can deploy strategies to reduce the attainment gaps.
6. If the assessment is in alignment with the COs, the performance of students indicates the CO attainment.
